Data Classification		
Choose a classification of confidentiality		
<input type="checkbox"/>	Public	An information asset is classified as public if the information is purposely aimed to be disclosed to the public and has no business impact for delaware if that information is disclosed.
<input type="checkbox"/>	Internal Use	An information asset is classified as internal use if the disclosure of the information to unauthorized individuals could only cause limited or no business impact to delaware.
<input checked="" type="checkbox"/>	Confidential	An information asset is classified confidential if the disclosure of the information to unauthorized individuals could cause a moderate business impact to delaware.
<input type="checkbox"/>	Strictly Confidential	An information asset is classified strictly confidential if the disclosure of the information to unauthorized individuals could cause a severe business impact to delaware.

Dear Mr. D [REDACTED]

The information security team of delaware international would like to thank you for your professional approach for sharing your findings with regards to [REDACTED]

We are pleased that you complied with the procedure as detailed in our 'responsible disclosure' on the delaware website. This shows that you are aware of the impact that ethical hacking testing can cause.

We wish you all the best with your future cyber security career.

Best regards,
Information Security Team delaware
